

## Subject Index Volume 270

- Acantholysis 467  
 Acetylator phenotype 171  
 Acetylspermidines 25  
 Acne conglobata 89  
 Acne vulgaris 250  
 Actinic keratosis 193  
 Activated macrophage 403  
 Aerobic cocci 181  
 All-trans-retinoic acid 469  
 Alphanaphthyl acetate esterase 165  
 Androgen metabolism 333  
 Angioedema 119  
 Angiotensin-converting enzyme (ACE)  
   dermatological diseases 341  
 Anthralin short-term application 223  
 Anti-basal cell nuclear antibodies 203  
 Antibody binding, pemphigus 463  
 Anti-inflammatory effects of retinoids 89  
 Antiviral action 145  
 Antiviral agents 146  
 Antiviral effect specificity 147  
 Argon-laser coagulation depth 435  
 Argon-laser treatment 430  
 Arterioles internal elastic laminae 400  
 Arthus reaction 347  
 Atopic dermatitis immunoglobulin  
   synthesis 233  
 Atopic dermatitis lysosomal enzyme release 239  
 Atopic dermatitis releasability of histamine 239  
 Atopic dermatitis sebaceous glands 167  
 ATP-measurement in human spermatozoa 243  
 Autoradiograms of the guinea pig 281  
 Autoradiography 273
- Bacterial cross-reacting antigens 175**  
 Bacterial skin flora 13-Cis retinoic acid 179  
 Basal cell carcinoma 193  
 Basaliom metastasierung 299  
 Basal lamina 465  
 Basement membrane proteins 241  
 Behçet's disease 81  
 Behçet's disease clinical symptoms 83  
 Benzo(a)pyrene 460  
 Bile acids 445  
 Blastomyces 381  
 B-Lymphocytes 232  
 Bromocriptin 363  
 Bullous pemphigoid with secondary  
   amyloidosis 226  
 Burns 159
- Calcium, EFC-A release 371  
 cAMP 7  
 cAMP diurnal fluctuation 13  
 cAMP oral mucosa 10  
 Candidiasis chronic mucocutaneous 229  
 Cataract 387  
 C2 deficiency auto-antibody to  
   complement 227  
 Cerebrosides 441  
 C1 esterase inhibitor activity 233  
 Chemotaxis high molecular weight  
   inhibitor 240  
 Chemotherapy viral infections 141  
 Chenodesoxycholsäure 451  
 Cholestasis 445  
 Cholinergic urticaria 228  
 Cholylglycin Serum und  
   Saugblasenflüssigkeit 448  
 Cignolin therapy of psoriasis 224  
 C1 inhibitor 119  
 Circulating antibodies 77  
 13-cis-retinoic acid 89; 245  
 13-cis retinoic acid bacterial skin flora 179  
<sup>14</sup>C-Linoleic acid in cerebroside  
   incorporation 443  
<sup>14</sup>C-Linoleic acid in cerebroside 441  
 Collagen synthesis 263  
 Collagen synthesis in scleroderma fibroblast  
   influence of serum 269  
 Collagen type synthesis 268  
 Complement 189  
 Connatal erythroleukemia 226  
 Contact sensitivity 255  
 Copper sulfate PMNL chemotaxis 85  
 Corticosteroids 123  
 Corticosteroid stratum corneum assay 252  
 Cutaneous drug-metabolizing enzymes 367  
 Cutaneous malignant lymphomas 285  
 Cutaneous melanoma phenotype risk  
   factors 33  
 Cutaneous needle prick pathology test 81  
 Cutaneous sarcoidosis 77  
 Cutaneous sensitive nerves tesaurismotic  
   process 62  
 Cytochrome P-450 367
- Danazol 119**  
 Dapsone 347  
 Dapsone passive arthus reaction 347  
 DDT-PMNL chemotaxis 85  
 Dehydroepiandrosterone 49  
 Dehydroepiandrosterone (DHEA) 333

- Dermal infiltrate proliferation kinetics 285  
 Desoxycholsäure 451  
 $\alpha$ -Difluoromethylornithine 30  
 $\alpha$ -Difluoromethylornithine topical application 29  
 Dimethylbenz(a)anthracene 460  
 Direct current conductivity of human stratum corneum 67  
 Disorders of keratinization 111  
 DNA repair 291  
 Domestic pig 394  
 Domestic pig skin experimental value 401  
 Drug metabolism of the skin 367  
 DTIC (dacarbazine)-induced hepatic damage 375  
  
 Early lichen planus 165  
 Ehlers-danlos syndrome type IV 238  
 Elastic fibres 391  
 Elastic fibre thickness in pig skin 394  
 Emission spectrum of a human epidermis section, negative ions 40  
 Emission spectrum of a human epidermis section, in positive ions 41  
 Enhancement 81  
 Enzyme polymorphism of dermal lymphocytes, mycosis fungoides 185  
 Eosinophil chemotactic factor of anaphylaxis 371  
 Eosinophil chemotactic factors 251  
 Epidermal barrier layer stereological parameters 99  
 Epidermal cells vacuolated after anesthetics i.c. 416  
 Epidermal Langerhans cell 232  
 Epidermal melanocyte 487  
 Epidermal permeability barrier lipids 95  
 Epidermal retinoids concentration ratios 195  
 Epidermal thinning 123  
 Epidermal vacuolation local anesthetics 413  
 Erythrocyte membrane 49  
 Experimental contact allergy in mice 232  
  
 Fatty acid incorporation 441  
 Ferritin tracers 110  
 Fibroblasts 241  
 Fibroblasts microcalorimetric investigations 251  
 Fluid mosaics 53  
 $\alpha$ -L-Fucosidase 57  
 Fucosidase activity 59  
 Fucosidosis type II ultrastructural studies 57  
  
 Gallensäuren Pruritus 445  
 Gene regulation 313  
 Glaswoll-Haar 353  
 Gleichspannungswiderstand Hautmodell 72  
  
 Glycocalyx 441  
 Glycocholate 445  
 Granulocyte chemotaxis 81  
 Grocott-Gömori staining 384  
 Growth hormone 129  
 Growth rate cultures of mouse ear skin explants 476  
 Guinea pig melanocytes 488  
  
 Hairless mice 367; 421; 453  
 Hairless mice effect of UV-irradiation on skin 424  
 Hair shaft anomalies 353  
 Hautfeuchtigkeit Kinetik des Abklingens 75  
 Hautfeuchtigkeit nach einem 1stündigen Wasserbad 72  
 Helper phenotype 483  
 Heterozygotic parents 291  
 Hexadecane 469  
 Histocompatibility complex 211  
 Histoplasma capsulatum 384  
 Host defense mechanisms 142  
 Host defense systems 148  
 ( $^3$ H thymidine incorporation) mouse ear epidermis 13  
 $^3$ H-thymidine labeling index cutaneous lymphomas 287  
 Human mast cells 250  
 Human papilloma virus type and acanthoma 247  
 Human skin diseases associated with lipid abnormalities 112  
 Human skin epithelium cells 313  
 Human skin epithelium cells effect of different agents on the proliferation 317  
 Hydration measurement of human horny layer 67  
 17 $\beta$ -Hydroxysteroid 54  
 17 $\beta$ -Hydroxysteroid-Oxidoreduktase 54  
 Hyperchemotaxis of PMNL 81  
  
 Idiopathic membranous glomerulonephritis 175  
 Ig, vivo-bound 465  
 Immuno-electron microscopy 463  
 Immunological functions of epidermal cells 230  
 Immunopathology psoriasis 201  
 Immunoproliferative small-intestinal disease (IPSID) 17  
 Interdigitating cells 248  
 Interferon 141; 148  
 Interferon inducers 151  
 Interferon-inducing agents 154  
 Interferon system 149  
 Intramembrane particle 1  
 Ion analysis 38  
 Ion microanalysis 37

- Keratoacanthoma 189; 460  
Killing test 197  
Kveim material 77
- Lamellar bodies and epidermal intercellular domains 98  
Lamellar body-derived intercellular lipid barrier current concepts 103  
Lamellar body secretion consequences 98  
Langzeitmesterolonbehandlung  
Steroidmetabolite 337  
Laser coagulation dermal vascular lesions 429  
Lectins 249  
Lenses, 8 MOP 389  
Lichen planus 163  
Light intensity distribution inside the skin 434  
Linked ichthyosis 238  
Lipid abnormalities 111  
Lipid and proteinaceous secretion of sexual hormones 325  
Lipid histochemistry and cytochemistry 100  
Lipids and percutaneous transport 107  
Lipids epidermal permeability barrier 95  
Lipogenesis in hamster ear sebaceous glands 243  
Local anesthetics artifact due to injection 413  
Local anesthetics epidermal vacuolation 413  
Localized cutis hyperelastica 225  
Lupus erythematosus profundus  
thalidomide 229  
Lymphocyte subpopulations and macrophage differentiation 249  
Lymphocyoma 285  
Lymphokine ESP 251  
Lymphomatoide papulosis 285  
Lysosomal enzymes in mycosis fungoides 187
- Macrophage dermo-epidermal junction 407  
Macrophage epidermal intercellular space 406  
Macrophage in dermis 405  
Malignant melanoma 33  
Mammalian epidermis freeze-fracture study 1  
Mast cells contact 248  
Mediterranean lymphoma 17  
Melanosomes 1  
Melanosomes freeze-fracture replica 3  
Membrane-mediated growth control 212  
Mesterolone (long-term use) 333  
Mesterolon-Langzeitabgabe Urinmetabolite 333  
8-Methoxypsoralen 387  
Methyl acrylate 273  
Microphage functions 197  
Miniature pig 394  
Modulus of elasticity 421  
Monoclonal antibodies 483  
8 MOP, lenses 389
- Mouse ear epidermis, explant culture 469  
Mouse ear skin section all-trans-retinoic acid 471  
Mucosal wound healing 7  
Mycosis fungoides 17; 285  
Mycosis fungoides, enzyme polymorphism of dermal lymphocytes 185  
Mycosis fungoides 249  
Mycostatin 487
- n-Butanol-osmium reaction stratum corneum 111  
Negative ions at mass 24 ( $C_2^-$ ) normal human skin 43  
Nerve fibers 248  
Nonhistone proteins 313  
Normal and psoriatic epidermis and dermis 443  
Nucleocapsid 143  
Nystatin intracellular calcium concentration 489
- Oral cancer and precancer 197  
Oral mucosa cAMP 10  
Ornithine decarboxylase 30
- Parapsoriasis 285  
Para-tertiary butylphenol depigmentation of the skin 224  
Passive immunotherapy in bee venom-allergic patients 230  
Pemphigus 463  
Penetration kinetics 49  
Penicillin exposed pork challenge of penicillinallergic volunteers 227  
Percutaneous penetration 37  
Phagocytic function of PMNL 81  
Photocarcinogenesis 453  
Photoreactivating enzyme 291  
Photosensitivity 255  
Physical properties of the hairs 353  
Pig elastic fibre arrangement in the skin 391  
Plane warts spontaneously regressing 403  
Plane warts ultrastructural studies 403  
Plasma protein in psoriasis scales 217  
PMNL function 347  
Polyamines 25  
Porphyria cutanea tarda 171  
Positive ions at mass 23 ( $Na^+$ ) normal human skin 43  
Potassium iodide patch-test 89  
Precipitate Kveim material 79  
Precipitating antibodies 77  
Prolonged erythema 33  
Propionibacteria 181  
Prostatic function acid phosphatase 242  
Protein A-peroxidase 463  
Pruritus 445

- Pruritus Gallensäuren 445  
 Pseudolymphoma 285  
 Psoralens binding to DNA by laser irradiation 234  
 Psoriasis 32; 49; 129; 132; 441  
 Psoriasis and human growth hormone 361  
 Psoriasis immune-mediated response 205  
 Psoriasis immunopathology 201  
 Psoriatic scales 313  
 Putrescine 25  
 PUVA 255  
 PUVA cells 235  
 PUVA-treatment 388  
 PUVA treatment in chromium hypersensitivity 255
- Rabbits** 77  
 Rat mast cells 240  
 Regulation of proliferation 313  
 Renal brush border antibodies 175  
 Retinoic acid 453; 469  
 Retinoids 193  
 Retrovirus 207  
 Russell bodies 381
- Sarkoidose ACE-Mittelwerte 343  
 Scleroderma esophagus function scintigraphy 225  
 Scleroderma fibroblasts 263  
 Sebaceous glands 168  
 Sebaceous glands atopic dermatitis 167  
 Sebocyte proliferation 244  
 Seborrheic keratosis 193  
 Secondary ion emission microanalysis 37  
 SEM 391  
 Sézary cells 483; 484  
 Sézary-syndrome 285  
 Skin fibroblasts photoinactivation and recovery 234  
 Skin flap 159  
 Skin vasculitis 175  
 Somatostatin 363  
 Span glass hair 353  
 Spermicide nonoxinol-9 242  
 Spermidine 25  
 Spermine 25  
 Steroid receptor analyses in tumor cytosol 246  
 Steroid sulfatase activity 238  
 STH circadian 133  
 STH-Gesamtwerte 132  
 STH im Blutserum 131  
 STH ng/ml Blutserum bei Nichtpsoriatikern 139  
 Stratum corneum antibodies 201  
 Stratum corneum deposits of fibrin 218  
 Stratum corneum effect of solvent treatment 107  
 Stratum corneum intercellular domains ultrastructure 99  
 Stratum corneum lipids arrangement into the broad membrane bilayers 104  
 Suction blister fluid 445  
 Sulfalithocholyglycine in Serum und Saugblasenflüssigkeit 449  
 Sulfalithocholycholate 445  
 Sunscreen products 421  
 Suppressor cells 255  
 Systemic scleroderma synthesis of collagen and non-collagenous protein 267  
 Systemic sclerosis 268
- T-cell proliferation** 231  
 T cells 206  
 Testosterone serum levels male psoriatics 377  
 Thalidomide lupus erythematosus profundus 229  
 Thermal injury on the vascularized groin flap in rats 161  
 T-Lymphocytes 409  
 Topical oestradiol-containing agents 245  
 Transport across diseased skin 110  
 Transport across experimentally perturbed stratum corneum 108  
 Transport across mucosal stratum corneum 110  
 Trioxsalen baths 157  
 Tubulo-acinar secretory units 328  
 Tunnelproteine 53
- Ultimate load tensile strength 421  
 Ultimate strain excised skin samples 421  
 Ultrastructural studies plane warts 403  
 Ultraviolet light 230  
 Unscheduled DNA synthesis 291  
 UV and RA 455  
 UV-A pigmentation 235  
 UV-B-induced impairment of antigen-presenting function of epidermal cells 230  
 UV-irradiation thickness of skin 421  
 UV-light 25
- Vascularized isolated groin flap 159  
 Verrucous hyperplasia of the skin long-term lithium therapy 226  
 Viral infections chemotherapy 141  
 Virus replication 142; 144  
 Vitamin A cutaneous levels 193
- Wachstumshormon** 129  
 Whole-body autoradiography 273  
 Wild boar 394
- Xeroderma pigmentosum 291  
 X-Linked dominant ichthyosis 27  
 X-Radiation, basal cell epithelioma 299
